Designer: Yeong Jin Lim

Historical Scenario Setup

To set up and play one of the twelve pre-generated scenarios that follow – or any such scenario that may be released in the future – first select which one to play via any method agreeable to both players. Then perform the following sequence in the exact order shown.
Each player may wish to read the SITUATION REPORT at this point in order to get a feel for the scenario's background.

HS.1 Free World Force and Communist

Side—Either player flips a coin: "heads" he will play the Free World Force side in the chosen scenario; "tails" the Communist.
Orders of Battle—Each player now gathers up all units and markers allotted to his side as shown in the two FORCES boxes on the left side of the scenario—the Free World Force box to the left and the Communist box to the right. The bold number to the right of each item shows how many are to be used (so x3 means to gather up three of those particular pieces). Most weapons in each Force consist of counters with the same name but different jam values, and each player can take whichever they want regardless of the jam value. The bold number shown to the right of each side's "Surrender" marker indicates the space of the Casualty Track into which that marker is to be placed (on that player's side of the Weapons Box). The bold number shown to the right of each side's "Ammo" marker indicates the space of Ammo Track into which that marker is to be placed (Each Ammo Marker has the flag of each side drawn on it for easy identification). The bold number shown to the right of each side's "Confusion" marker indicates the space of Confusion Track into which that marker is to be placed (Each Confusion Marker has the flag of each side drawn on it for easy identification). Any such item marked with a superscripted number (such as x3 1) indicates that that item has a special rule attached to it: all such special rules will be found in the large box at the bottom right of the scenario labeled (you guessed it) SPECIAL RULES.

HS.2 Battlefield

Map—The MAPBOARD CONFIGURATION in the upper right portion of the scenario will show which map is to be used (via the large number in the center of the hex-compass). Then, using that map's hex compass, align it to the Free World Force and Communist players as indicated in the diagram.

Track Display—Place the Track Display to the left or right side of the map where both players can reach.

Markers—To form two separate "draw cups" for random selection during play, place all of the Objective chits into one opaque container – such as a clean, dry coffee cup – and all of the Smoke/ Blaze markers into another.

HS.3 The Setup Boxes

Locate the box labeled YEAR MARKER (with a red outline) underneath the SITUATION REPORT. There are a series of similar boxes, each with an arrow leading from it to another setup box. Players set up the game's units and markers by following this path.

Again, any item within a setup box that is followed by a superscripted number indicates that that item has a special rule attached to it which will be found in the SPECIAL RULES box.

HS.3.1 Year Marker

Place the Year marker into the listed space of the Year Track.

HS.3.2 VP Marker

Place the VP marker into the listed space of the Victory Track (making sure it's on the correct side of the "0" space, if appropriate).

HS.3.3 Time Track

Place both the Time and Sudden Death markers into the indicated spaces of the Time Track. At this time, if the Scenario is Day Time, place the Time Marker on the Time Track so that the Day Side is visible, and if it is Night Time, place the Time Marker so that the Night Side is visible. This Time Marker is a feature that reminds players to play by applying Night Rules when the Night Side is visible.

HS.3.4 Troop Quality & Number of Orders

Place each nationality's OB Stats marker into the space of the OB Display matching the TROOP QUALITY and # OF ORDERS shown.

HS.3.5 Posture

This gives the Posture for each side, as well as showing which player will begin the game in possession of the Initiative card.

HS.3.6 Objective Chits

IMPORTANT: Quite often a scenario SPECIAL RULE will instruct the players at this point to remove one or more Objective chits from the draw cup. If so, make sure the appropriate chits have been removed before drawing any random Objectives.
This setup box indicates how many Objective chits will begin the game in play, as well as whether those chits will be drawn at random or specifically assigned.
First, if the OPEN row lists one or more Objective chits by their specific letter identification (for example: OPEN – P), search the cup for those particular chits and place them with their "open" side face up in the central section of the Objective Box on the Track Display.
Next, if the OPEN row indicates a "random" chit is to be drawn, either player draws a random Objective chit from the cup then places it with its "open" side face up in the central section of the Objective Box.
Finally, if "random" is listed on the Free World Force and/or Communist rows, the player commanding that side draws a random Objective chit from the cup, looks at it, then places it with its "secret" side face up in his section of the Objective Box (unless it has no secret side; in which case it is placed with its "open" side face up in the central section).
Ownership of a secret Objective chit should be clear at all times so that the players know which one of them is allowed to peek at the underside during play.
If one or both players pull a random chit with no secret side, that player won't get a secret Objective: it will have already been revealed at game start. Note that such an open Objective chit is placed in the central portion of the Objective Box as its ownership is not relevant.
The word "none" on either or both of the Free World Force / Communist rows indicates that the controlling player will not get to draw a secret Objective at the beginning of that scenario.
IMPORTANT: The VP level given in step HS.3.2 already takes into account any open Objectives that may be indicated in the OBJECTIVE CHITS box. However, if a random chit draw results in an Open Objective being pulled, the VP marker should be adjusted accordingly in the direction of the player that begins the game in control of that mapboard Objective (as indicated in the next setup box).

HS.3.7 Objective Control

This box indicates which player controls which of the mapboard Objectives at the beginning of play. Place control markers as appropriate.

HS.3.8 Aircraft Marker

This box indicates whether to place an Aircraft Marker in the Aircraft Box (None), on the Landing Side (Landing), or on the Take-off Side (Take-off). If set to None, the Air Support Order cannot be played in this scenario.

HS.3.9 Set Up

This box indicates the order of set up; as well as how deep each player may set up his allotted forces counted from those hexes along his friendly board edge, inclusive. Don't set up quite yet, though…

HS.3.10 Special Rules

Players should now read and familiarize themselves with any special rules shown in this box that haven't already been referred to by a superscripted number in a FORCES box or an earlier setup box.

HS.4 Selecting Radio & Deploy Forces

Before Set Up, each player refers to the Available Radio Table and secretly selects one of the Radio Markers available for the current scenario's year, or secretly selects an Artillery Denied Marker and reveals it simultaneously. Each player pays the VP cost of the selected Radio Marker to adjust the VP Markers on the VP Track. Then, the owner places the Radio Marker in the desired Round space of the Artillery Box, and places the Artillery Denied Marker in the Artillery Denied Space.

Players now set up their forces within the parameters given in the SET UP and/or SPECIAL RULES boxes. Stacking limits must be observed.

HS.5 Fate Cards

Once set up is complete, each player shuffles his nationality's Fate cards together to form a face-down draw pile. Each player then draws Fate cards from the top of his Fate Deck until his Posture's hand size is reached:7 if Invade; 6 if Attack; 5 if Recon; 4 if Defend; or 4 if Straggler.

HS.6 H-Hour

Finally, see the SET UP box to determine which of the players will take the first Turn of the game.

HS.7 Aftermath

When players finish the scenario, they check what historical outcome was produced and compare it with the play results.

ROK(FWF)
Cpt. Lee
1Lt. Baek
Police Squad x5
BAR MG x2
Satchel Charge x1
Surrender: 6
Ammo: 0
Confusion: 2

KPA(Communist)
Lt. Woo
Sgt. Park
Elite Squad x2
SMG Squad x3
Elite Team x2
Weapon Team x4
Light MG x3
Medium MG x1
Medium Mortar x2
Surrender: 9
Ammo: 10
Confusion: 0

0. Situation Report:
At dawn on June 25, 1950, the ROK Army, whose front-line defenses had collapsed due to a surprise attack by the KPA, hastily withdrew in near disintegration. The 6th Infantry Division of the KPA 1st Corps attempted to blockade Kaesong and cut off its retreat route, while 50 members of the Kaesong Railway Police switched to combat readiness to defend the city.

1. Year Marker: "1950" space

2. VP Marker: "10" space

3. Time Track:
Time – "7" space (Day)
Sudden Death – "12" space

4. Troop Quality / # Orders:
FWF – Line / 2
Communist – Elite / 3

5. Posture:
FWF – Defend
Communist – Attack
Initiative Card – Communist

6. Objective Chits:
OPEN – T
FWF – random
Communist – none

7. Objective Control:
FWF – all
Communist – none

8. Aircraft Marker: none

9. Set Up: (FWF will take first Turn)
FWF – last; 7 hexes deep
Communist – first; 1 hex deep

10. Special Rules:
(1) Fog: Due to the effects of an early-morning fog, there is a –1 Hindrance in every hex of the map, regardless of elevation.
(2) Ambush Unit: The Breeze Event of a KPA Fate card is treated as an Infiltration Event.
(3) No Back Up: The FWF player may not gain exit VPs; any FWF unit exiting the map for any reason is eliminated.
(4) Rubble : After the very last step of the Time Marker Advance Procedure is completed, the FWF player must place a Wire in or adjacent to a building hex where at least one friendly unit is located.

11. Aftermath:
The KPA eventually occupied downtown Kaesong. The Kaesong Railway Police Force carried out a last stand, and most of them were killed, but three of them broke through

the line of fire and escaped.
