Designer: Yeong Jin Lim

Historical Scenario Setup

To set up and play one of the twelve pre-generated scenarios that follow – or any such scenario that may be released in the future – first select which one to play via any method agreeable to both players. Then perform the following sequence in the exact order shown.
Each player may wish to read the SITUATION REPORT at this point in order to get a feel for the scenario's background.

HS.1 United Nations and Communist

Side—Either player flips a coin: "heads" he will play the United Nations side in the chosen scenario; "tails" the Communist.
Orders of Battle—Each player now gathers up all units and markers allotted to his side as shown in the two FORCES boxes on the left side of the scenario—the United Nations box to the left and the Communist box to the right. The bold number to the right of each item shows how many are to be used (so x3 means to gather up three of those particular pieces). Most weapons in each Force consist of counters with the same name but different jam values, and each player can take whichever they want regardless of the jam value. The bold number shown to the right of each side's "Surrender" marker indicates the space of the Casualty Track into which that marker is to be placed (on that player's side of the Weapons Box). The bold number shown to the right of each side's "Ammo" marker indicates the space of Ammo Track into which that marker is to be placed (Each Ammo Marker has the flag of each side drawn on it for easy identification). The bold number shown to the right of each side's "Confusion" marker indicates the space of Confusion Track into which that marker is to be placed (Each Confusion Marker has the flag of each side drawn on it for easy identification). Any such item marked with a superscripted number (such as x3 1) indicates that that item has a special rule attached to it: all such special rules will be found in the large box at the bottom right of the scenario labeled (you guessed it) SPECIAL RULES.

HS.2 Battlefield

Map—The MAPBOARD CONFIGURATION in the upper right portion of the scenario will show which map is to be used (via the large number in the center of the hex-compass). Then, using that map's hex compass, align it to the United Nations and Communist players as indicated in the diagram.

Track Display—Place the Track Display to the left or right side of the map where both players can reach.

Markers—To form two separate "draw cups" for random selection during play, place all of the Objective chits into one opaque container – such as a clean, dry coffee cup – and all of the Smoke/Blaze markers into another.

HS.3 The Setup Boxes

Locate the box labeled YEAR MARKER (with a red outline) underneath the SITUATION REPORT. There are a series of similar boxes, each with an arrow leading from it to another setup box. Players set up the game's units and markers by following this path.

Again, any item within a setup box that is followed by a superscripted number indicates that that item has a special rule attached to it which will be found in the SPECIAL RULES box.

HS.3.1 Year Marker

Place the Year marker into the listed space of the Year Track. Since specific terrain or special rules may refer to the Month, they are displayed in Year(Month) format.

HS.3.2 VP Marker

Place the VP marker into the listed space of the Victory Track (making sure it's on the correct side of the "0" space, if appropriate).

HS.3.3 Time Track

Place both the Time and Sudden Death markers into the indicated spaces of the Time Track. At this time, if the Scenario is Day Time, place the Time Marker on the Time Track so that the Day Side is visible, and if it is Night Time, place the Time Marker so that the Night Side is visible. This Time Marker is a feature that reminds players to play by applying Night Rules when the Night Side is visible.

HS.3.4 Troop Quality & Number of Orders

Place each nationality's OB Stats marker into the space of the OB Display matching the TROOP QUALITY and # OF ORDERS shown.

HS.3.5 Posture

This gives the Posture for each side, as well as showing which player will begin the game in possession of the Initiative card.

HS.3.6 Objective Chits

IMPORTANT: Quite often a scenario SPECIAL RULE will instruct the players at this point to remove one or more Objective chits from the draw cup. If so, make sure the appropriate chits have been removed before drawing any random Objectives.
This setup box indicates how many Objective chits will begin the game in play, as well as whether those chits will be drawn at random or specifically assigned.
First, if the OPEN row lists one or more Objective chits by their specific letter identification (for example: OPEN – P), search the cup for those particular chits and place them with their "open" side face up in the central section of the Objective Box on the Track Display.
Next, if the OPEN row indicates a "random" chit is to be drawn, either player draws a random Objective chit from the cup then places it with its "open" side face up in the central section of the Objective Box.
Finally, if "random" is listed on the United Nations and/or Communist rows, the player commanding that side draws a random Objective chit from the cup, looks at it, then places it with its "secret" side face up in his section of the Objective Box (unless it has no secret side; in which case it is placed with its "open" side face up in the central section).
Ownership of a secret Objective chit should be clear at all times so that the players know which one of them is allowed to peek at the underside during play.
If one or both players pull a random chit with no secret side, that player won't get a secret Objective: it will have already been revealed at game start. Note that such an open Objective chit is placed in the central portion of the Objective Box as its ownership is not relevant.
The word "none" on either or both of the United Nations / Communist rows indicates that the controlling player will not get to draw a secret Objective at the beginning of that scenario.
IMPORTANT: The VP level given in step HS.3.2 already takes into account any open Objectives that may be indicated in the OBJECTIVE CHITS box. However, if a random chit draw results in an Open Objective being pulled, the VP marker should be adjusted accordingly in the direction of the player that begins the game in control of that mapboard Objective (as indicated in the next setup box).

HS.3.7 Objective Control
This box indicates which player controls which of the mapboard Objectives at the beginning of play. Place control markers as appropriate.

HS.3.8 Aircraft Marker
This box indicates whether to place an Aircraft Marker in the Aircraft Box (None), on the Landing Side (Landing), or on the Take-off Side (Take-off). If set to None, the Air Support Order cannot be played in this scenario.

HS.3.9 Selecting Radio & Deploy Forces
Before Set Up, each player refers to the Available Radio Table and secretly selects one of the Radio Markers available for the current scenario's year, or secretly selects an Artillery Denied Marker and reveals it simultaneously. Each player pays the VP cost of the selected Radio Marker to adjust the VP Markers on the VP Track. Then, the owner places the Radio Marker in the desired Round space of the Artillery Box, and places the Artillery Denied Marker in the Artillery Denied Space. The player with the Initiative Card places it first.
Players now set up their forces within the parameters given in the SET UP and/or SPECIAL RULES boxes. Stacking limits must be observed.

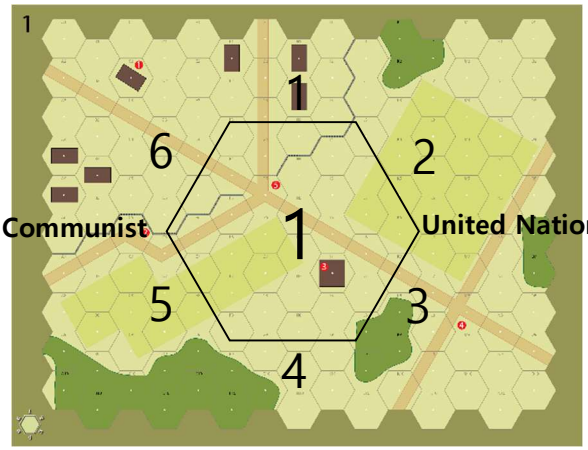

HS.3.11 Set Up
This box indicates the order of set up; as well as how deep each player may set up his allotted forces counted from those hexes along his friendly board edge, inclusive. Don't set up quite yet, though….

HS.3.12 Special Rules
Players should now read and familiarize themselves with any special rules shown in this box that haven't already been referred to by a superscripted number in a FORCES box or an earlier setup box.

HS.5 Fate Cards
Once set up is complete, each player shuffles his nationality's Fate cards together to form a face-down draw pile. Each player then draws Fate cards from the top of his Fate Deck until his Posture's hand size is reached:7 if Invade; 6 if Attack; 5 if Recon; 4 if Defend; or 4 if Straggler.

HS.6 H-Hour
Finally, see the SET UP box to determine which of the players will take the first Turn of the game.

HS.7 Aftermath
When players finish the scenario, they check what historical outcome was produced and compare it with the play results.

Fifth Column

0. Situation Report:
Taking advantage of the troop vacancy at the Daegu 6th Regiment due to deployments for suppressing the Yeosu-Suncheon Rebellion, South Korean Workers' Party cell leaders staged a mutiny by intentionally informing on themselves to draw in and assassinate two officers, while also executing around ten NCOs inside the camp. As the regimental military police units dispatched to suppress them, the rebels opened fire with machine guns and mortars at the main gate.

1. Year Marker: "1948" space (November) (1)
2. VP Marker: "0" space
3. Time Track:
   Time – "2" space (Day)
   Sudden Death – "7" space
4. Troop Quality / # Orders:

   Communist – 1, 2, and 5
8. Aircraft Marker: None
9. Set Up: (UN will take first Turn)
   UN – first; 6 hexes deep
   Communist – last; 6 hexes deep
10. Special Rules:
(1) Early War: The scenario year is 1950 for all purposes.
(2) US Support: Place Cpl. Buehler, the two KATUSA Squads, and the two Heavy MGs into the "6" space of the Time Track. The UN player controls both ROK Units and US Units and uses the ROK Fate Deck.
(3) Munity: During setup, when selecting radios, both players may only bid for the Artillery Denied Marker. There is no artillery support in this scenario (No Radio).

11. Aftermath:
Attempting to escape in vehicles, the rebels were neutralized by machine-gun fire from US forces and subsequently fled into the mountainous terrain. The remaining mutiny sympathizers left inside the camp were disarmed by the military police.

The Battle of AnmokBeach

0. Situation Report:

With the outbreak of the war on June 25, 1950, the KPA landed on several coastlines in Gangwon Province. Upon receiving reports from the police and villagers that the KPA was landing, the 10th Regiment of the ROK's 8th Division dispatched several companies to the coast in response; among them, the 57mm anti-tank gun company was deployed to Anmok Beach. Upon arriving at Anmok Beach, the unit discovered that the advance detachment of the KPA's 945th Marine Corps was already secretly landing.

1. **Year Marker:** "1950" space (June)
2. **VP Marker:** "2" space (UN side)
3. **Time Track:**
   - Time – "3" space (Day)
   - Sudden Death – "9" space
4. **Troop Quality / # Orders:**
   - UN – Line / 3
   - Communist – Elite / 5
5. **Posture:**
   - UN – Recon
   - Communist – Invade
   - Initiative Card – UN
6. **Objective Chits:**
   - OPEN – random
   - UN – random
   - Communist – random
7. **Objective Control:**
   - UN – all
   - Communist – none
8. **Aircraft Marker:** Landing
9. **Set Up:** (UN will take first Turn)
   - UN – last; 5 hexes deep
   - Communist – first; 1 hex deep
10. **Special Rules:**

(1) Back Up: The UN player place three Engineer Units and two Flamethrowers in the 7 space of the Time Track. When these units are reinforced, add 6 to ROK's Ammo.
(2) Second Wave: The Communist player must place at least nine of his units and at least four of his weapons in the 4 space of the Time Track.
(3) The UN player may not gain exit VPs.

11. Aftermath:

The 57mm anti-tank gun company concentrated fire on the enemy landing on the beach and the enemy fleet attempting to dock. While repelling them, they simultaneously requested reinforcements from the regiment, and with the addition of artillery and engineering support, the KPA's landing plan at Anmok failed.

The Battle of Kaesong Station

0. Situation Report:
At dawn on June 25, 1950, the ROK Army, whose front-line defenses had collapsed due to a surprise attack by the KPA, hastily withdrew in near disintegration. The 6th Infantry Division of the KPA 1st Corps attempted to blockade Kaesong and cut off its retreat route, while 50 members of the Kaesong Railway Police switched to combat readiness to defend the city.

1. Year Marker: "1950" space (June)
2. VP Marker: "10" space (UN side)
3. Time Track:
    Time – "7" space (Day)
    Sudden Death – "11" space
4. Troop Quality / # Orders:
    UN – Line / 2
    Communist – Elite / 3
5. Posture:
    UN – Defend
    Communist – Attack
    Initiative Card – Communist
6. Objective Chits:
    OPEN – T
    UN – random
    Communist – none
7. Objective Control:
    UN – all
    Communist – none
8. Aircraft Marker: Landing
9. Set Up: (UN will take first Turn)
    UN – last; 7 hexes deep
    Communist – first; 1 hex deep
10. Special Rules:
(1) Ambush Unit: The Breeze Event of a KPA Fate card is treated as an Infiltration Event – Roll on KPA Support Table. Select an available unit then place it in or adjacent to a random hex.
On the day before the war broke out, some KPA troops infiltrated Kaesong City.
(2) No Back Up: The UN player may not gain exit VPs; any UN unit exiting the map for any reason is eliminated.
(3) Rubble: After the very last step of the Time Marker Advance Procedure is completed, the player with the Initiative card must place a Wire in or adjacent to a building hex where at least one ROK unit is located.
The KPA's tanks and artillery units fired shells steadily into the city.
(4) During the scenario, radio markers cannot be placed in or moved into the Smoke Round Space of the Artillery Box.
11. Aftermath:
The KPA eventually occupied downtown Kaesong. The Kaesong Railway Police Force carried out a last stand, and most of them were killed, but three of them broke through the line of fire and escaped.

Osburn Company's Withdrawal Operation

0. Situation Report:

In early July 1950, soldiers of the 1st Battalion, 34th Regiment, took positions on the high ground between Pyeongtaek and Osan to block the KPA's southward advance. They received reports that Task Force Smith might withdraw into the area they were defending. Soon, a battalion-sized unit spotted them, and by the time they realized it was not Task Force Smith, the force had already advanced right to their doorstep. Now, Osburn Company (1st Company) had to withdraw.

1. Year Marker: "1950" space (July)
2. VP Marker: "4" space (UN side)
3. Time Track:
   - Time – "2" space (Day)
   - Sudden Death – "10" space
4. Troop Quality / # Orders:
   - UN – Green / 2
   - Communist – Elite / 4
5. Posture:
   - UN – Defend
   - Communist – Attack
   - Initiative Card – Communist
6. Objective Chits:
   - OPEN – D and E
   - UN – none
   - Communist – none
7. Objective Control:
   - UN – 1, 3, 4 and 5
   - Communist – none
8. Aircraft Marker: Landing
9. Set Up: (Communist will take first Turn)
   - UN – first; 12 hexes deep (3)
   - Communist – last; 3 hexes deep (3)
10. Special Rules:

(1) 1st Platoon is deployed to hexes that are not hills. 2nd Platoon is deployed to hill hexes that are Level 1 or 2. 3rd Platoon is deployed to hill hexes that are Level 2 or 3.

(2) Units for Main Attack are deployed on hill hexes. Units for Supporting Attack are deployed on non-hill hexes.

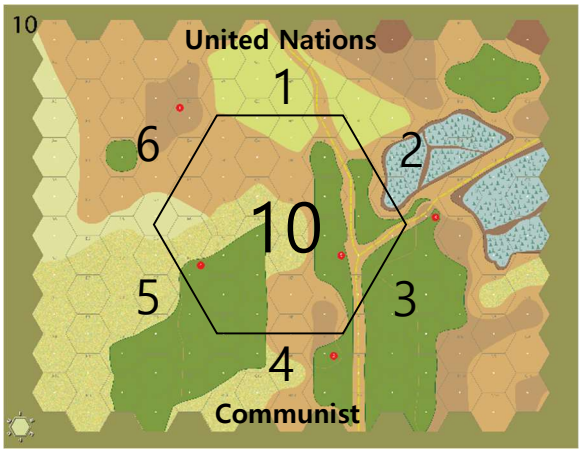

(3) After the Communist's Set Up is finished, the UN player places the Listening Post in an empty hex among the Communist's Set Up hexes.

(4) No Grenades!: US players cannot use Grenades! Reflex.

Osburn Company at the time did not have grenades.

11. Aftermath:

Due to the KPA's wave of offensives, Osburn Company withdrew to Pyeongtaek with barely more than 100 of its 140 members.

West Company's Escape

0. Situation Report:

The KPA's 3rd Assault Group infiltrated and occupied the high ground behind the U.S. 1st Cavalry Division, which was defending Waegwan near Daegu. On September 6, the 2nd Battalion, including Captain West's 7th Company, was tasked with destroying the KPA forces that had infiltrated the rear. However, the KPA surrounded them, and 7th Company, desperate to find a way to retreat, lost even its weapons platoon in the darkness. Now they had to escape this damn place.

1. Year Marker: "1950" space (September)
2. VP Marker: "0" space
3. Time Track:
   - Time – "0" space (Day)
   - Sudden Death – "6" space
4. Troop Quality / # Orders:
   - UN – Green / 3
   - Communist – Green / 1
5. Posture:
   - UN – Straggler
   - Communist – Defend
   - Initiative Card – UN
6. Objective Chits:
   - OPEN – Y and Z
   - UN – none
   - Communist – none
7. Objective Control:
   - UN – 1
   - Communist – 2, 3, 4, and 5
8. Aircraft Marker: Landing
9. Set Up: (UN will take first Turn)
   - UN – last; 4 hexes deep (2)
   - Communist – first; 10 hexes deep (1)
10. Special Rules:

(1) Communist player sets up first using the following method: for each KPA unit, determine a random hex using the KPA Fate Deck–that unit must set up in or adjacent to that hex. Weapons and Fortifications allotted to the Communist player are then assigned to KPA units.

(2) UN player sets up second: US's 7th Company must be placed in the hexes in columns K–O, and US's Weapon Platoon must be placed in the hexes in columns A–E. No US unit may set up in the same hex as a KPA unit.

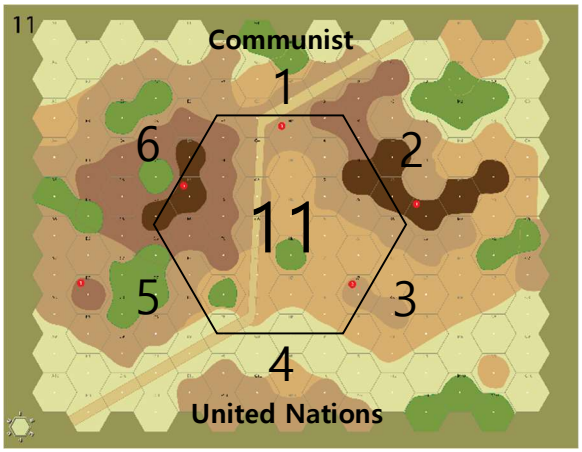

(3) Surrender Invitation: UN player gains +1 to each of his Melee rolls in Melee that includes his KATUSA Squad.

KATUSA soldiers raided KPA positions and took some of the boy soldiers of KPA as prisoners.

(4) The Communist player may not gain exit VPs.

11. Aftermath:

Amidst the KPA's intense shelling, 7th Company reunited with its weapons platoon, formed a reconnaissance team to escape to the main force, and successfully made contact.

The Ten Brave Warriors

0. Situation Report:

On May 3, 1949, the KPA illegally occupied the area around Mt. Songak in Kaesong, south of the 38th parallel. On the following day, May 4, the 11th Regiment of the ROK's 1st Division launched a counterattack in the morning to retake the lost positions, but struggled against the KPA's solid machine gun positions. Ten brave soldiers who volunteered to join the special forces carried mortar shells and launched an assault on the enemy machine gun positions with the support of friendly suppression fire and artillery fire.

1. Year Marker: "1949" space (May) (1)

2. VP Marker: "9" space (KPA side)

3. Time Track:

Time – "2" space (Day)

Sudden Death – "7" space

4. Troop Quality / # Orders:

UN – none

Communist – 1, 2, 3, 4, and 5

8. Aircraft Marker: none

9. Set Up: (UN will take first Turn)

UN – last; 2 hexes deep

Communist – first; 7 hexes deep

10. Special Rules:

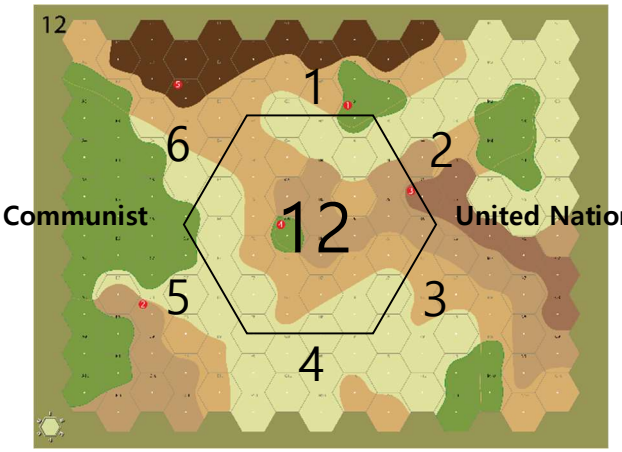

(1) Early War: The scenario year is 1950 for all purposes.

(2) The Ten Brave Warriors cannot transfer their Satchel Charge to other friendly units. *These are warriors who were selected because they volunteered to charge.*

(3) Noble Sacrifice: When a ROK Recon Team with Satchel Charge or Sgt. Han with Satchel Charge (These stand for The Ten Brave Warriors) enters an enemy-occupied hex, the UN Player may eliminate all pieces in that hex while eliminating it before Melee occurs. And place a smoke in that hex.

11. Aftermath:

When Sergeant Park Chang-geun charged with a mortar shell to destroy a pillbox but was killed by concentrated fire on the way to the enemy lines, the remaining soldiers crawled 300 meters toward their respective designated targets. Although battered by bullets, they ultimately threw themselves in front of the enemy to complete the mission. Thanks to their sacrifice, the lost heights could be recaptured.

Alfonso's Company's Attack on the Position

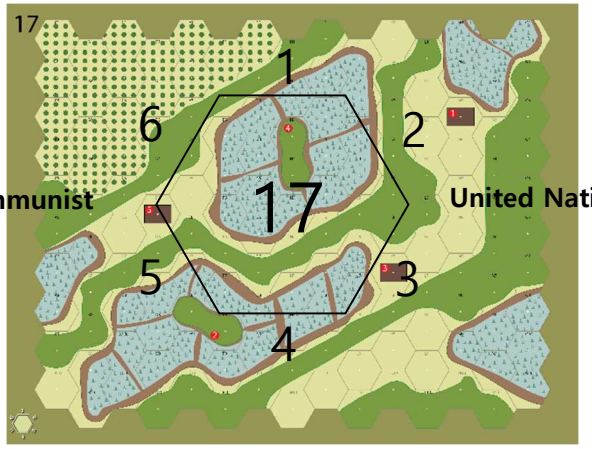

0. Situation Report:

From the night of August 5 to the dawn of August 6, 1950, the North Korean 4th Division launched a surprise nighttime river crossing and infiltration via the Ohang Ferry and other routes. Subsequently, U.S. forces continued to conduct counterattacks but failed repeatedly, while the scale of North Korean troops crossing the Nakdong River grew steadily. Then, on August 16, Captain Alfonso's company launched an attack to recover the lost defensive area—this time, to retake it.

1. Year Marker: "1950" space (August)
2. VP Marker: "5" space
3. Time Track:
Time – "4" space (Day)
Sudden Death – "10" space
4. Troop Quality / # Orders:

UN – none
Communist – random
7. Objective Control:
UN – none
Communist – all
8. Aircraft Marker: Take-off
9. Set Up: (UN will take first Turn)
UN – last; 3 hexes deep
Communist – first; 11 hexes deep
10. Special Rules:
(1) Place the following US units in the "7" space of the Time Track: Pfc Hubbard, three Green Squads, one Green Team, three BAR MGs, and the Light RR.
(2) Ammo Shortage: When the US Weapon is about to break, eliminate it instead.
(3) Layered rock cliffs: Place one Wire Marker on any 5 of the following hexes: C3, D3, E3, F2, G2, H2, I2, J2, K2, and L1.

11. Aftermath:

Alfonso's company eventually succeeded in recapturing the layered cliff area. However, with more than half of his soldiers killed or wounded, further attacks were halted, and the company shifted to a defensive posture, holding its position.

Rush to Retreat

0. Situation Report:

The KPA 6th Division's 14th Regiment and the Ministry of Home Affairs' 38th Guards 3rd Brigade invaded the Ongjin Peninsula at dawn on June 25 and carried out a blockade operation to prevent ROK forces from retreating to Seoul via Bupo Port. Due to the sudden invasion, many soldiers of the ROK 17th Regiment were left behind before they could even reach the port. Now, they must reach the port by the afternoon. There is not much time left to escape.

1. Year Marker: “1950” space (June)
2. VP Marker: “0” space
3. Time Track:
   - Time – “0” space (Night) (1)
   - Sudden Death – “5” space
4. Troop Quality / # Orders:
   - UN – Green / 3
   - Communist – Line / 2
5. Posture:
   - UN – Straggler
   - Communist – Recon
   - Initiative Card – Communist
6. Objective Chits:
   - OPEN – Y
   - UN – none
   - Communist – none
7. Objective Control:
   - UN – none
   - Communist – none
8. Aircraft Marker: none (1)
9. Set Up: (UN will take first Turn)
   - UN – last; 3 hexes deep
   - Communist – first; 4 hexes deep
10. Special Rules:

(1) Early Dawn: When the Time Marker advances to the “4” space, flip the Time Marker from the "Night" side to the "Day" side. From this point on, it is Day, and Night Rules do not apply. Place the Aircraft Marker (Status) in the Aircraft Box with Landing Side. Remove all illumination markers on the map. After the final step of the Time Marker Advance Procedure is completed, move all Radio Markers from the Illumination Round space to the HE Round space and flip them to the "Artillery Delayed" side.

(2) Artillery bombardment at Bupo Port: Each player’s Snipers MUST select one unit (enemy or friendly) in or adjacent to the random hex and break it.

The ROK artillery unit continued shelling until they retreated by boat from Bupo Port, and the straggling ROK troops were unaware of this.

11. Aftermath:

The straggling ROK soldiers desperately broke through the KPA's ambush and arrived at Bupo Port, and from that night on, the ROK soldiers at Bupo Port carried out an unorganized retreat aboard landing ships or civilian vessels.
